

SeamX DDJ-1

High-performance floor expansion joint cover system

Product Description

SeamX DDJ-1 is an aluminum floor expansion joint cover system designed for pedestrian traffic areas.

The system consists of engineered aluminum profiles integrated with Polybit sealing technologies to accommodate movement while maintaining long-term seal performance.

BASIC USES

- Floor expansion joint cover system for pedestrian traffic areas.

SYSTEM COMPONENTS

- Extruded aluminum profiles
- Integrated Polybit sealing system

FINISHES

- Aluminum: Anodised finish.

SeamX DDJ-1

INSTALLATION REQUIREMENTS

- Mechanical fixing accessories and alignment components as required to ensure correct installation in accordance with project specifications.

LIMITATIONS

- Joint width of SeamX DDJ-1 expansion joint cover sections is 50 mm.

SYSTEM PERFORMANCE

- Waterproofing, fire performance, and sealing behavior of the system are designed to integrate with Polybit technologies where required by project specifications.

WARRANTY

- Warranty provisions shall apply to the performance of the complete SeamX system when installed in accordance with approved Polybit installation guidelines.

SeamX DDJ-1

NOTE

System configuration may vary depending on joint width and project specifications.
