

# SeamX DDJ-2

Aluminum expansion joint cover assembly

---

## Product Description

SeamX DDJ-2 is an aluminum floor cover system consisting of dual extruded aluminum frames, engineered for integration with Polybit sealing technologies to ensure reliable seal performance.

---

## BASIC USES

- Floor expansion joint cover for pedestrian traffic areas.

---

## SYSTEM COMPONENTS

- Extruded aluminum profiles
- Integrated sealing system designed to work with Polybit sealing technologies

---

## FINISHES

- Aluminum: Anodised finish.

# SeamX DDJ-2

## INSTALLATION REQUIREMENTS

- Appropriate mechanical fasteners and alignment components are required to ensure proper installation and system performance. Installation shall be carried out in coordination with compatible Polybit sealing technologies.

## LIMITATIONS

- Joint width of SeamX DDJ-2 expansion joint cover system is 50 mm.

## SYSTEM PERFORMANCE

- The SeamX expansion joint cover system is engineered to support floor movement, maintain joint integrity, and contribute to overall waterproofing and seal performance as part of a coordinated Polybit system solution.

## WARRANTY

- SeamX systems are supplied as part of an integrated joint cover solution. Performance is based on correct product selection, proper installation, and compatibility with Polybit sealing technologies. Warranty provisions apply to the system as installed in accordance with approved installation requirements.

# SeamX DDJ-2

---

## NOTE

System configuration may vary depending on joint width and project specifications.
