

# SeamX DDJ

Aluminum Expansion Joint System

---

## Product Description

SeamX DDJ is an architectural expansion joint cover designed to accommodate structural movement while maintaining a clean and durable finish.

The system consists of extruded aluminum frames and a flexible insert, engineered to integrate with Polybit sealing technologies.

---

## BASIC USES

- Floor expansion joints in pedestrian areas.
  - Suitable for commercial, healthcare, retail and public buildings.
  - Designed where durability and minimal visual interruption are required.
- 

## SYSTEM COMPONENTS

- Extruded aluminum frame
  - Flexible insert
  - Polybit elastomeric sealing system
-

# SeamX DDJ

---

## FINISHES

- Aluminum: Mill finish, anodized or powder coated.
- 

## PERFORMANCE

- Movement capability depends on joint width and system configuration.
- 

## WATERPROOFING

- Water tightness is achieved through Polybit elastomeric sealant technology.
- 

## FIRE PROTECTION

- Fire rating is available when installed using Polybit fire-rated sealing systems.
- 

## INSTALLATION

- Installation may be recessed or surface mounted depending on project requirements. Final configuration shall follow Polybit recommendations.

# SeamX DDJ

---

## NOTE

System configuration may vary depending on joint width and project specifications.
